

'The Industrial Workhorse'

Economical, Efficient & Easy to Use.

The ZAPPY3 PRO is an innovative new electric vehicle that is revolutionizing personal transportation in the workplace. Designed for commercial, industrial and security needs, our PRO model goes up to 24 miles on a single charge and has a top speed of 15 miles per hour. Three wheels provide greater stability and safety than regular two-wheeled transporters, not to mention more torque and longer range for more rigorous, work-related activities.

The advanced wheel-motor design built into the front wheel allows for better overall performance, efficiency as well as maneuverability, with a turning-radius which allows the user to make a 360° turn. The PRO has the same or better performance than standard gasoline or diesel vehicles at a lower cost. It plugs into any conventional 110-volt household outlet and has zero exhaust emissions, making it great for indoor use and personal transportation in airports, warehouses, corporate campuses, and other industries.

* Range will vary significantly depending on hill grade, speed, and rider weight.

Remember: Always Wear a Helmet.
For individuals 12 yrs and over.

100% ELECTRIC PLUG IN

ZAP customers say the ZAPPY3 PRO saves money on improving operations and lowering fueling and maintenance costs. Some businesses even say that it can, in some instances, be used in place of a car, which also saves on parking and space. Silent, powerful and versatile, the ZAPPY3 PRO can also be a useful tool for law enforcement and security.

Speed: Up to 13 mph* (21 km/h)

Range: Up to 24 miles* (38.6 Km)

Motor: 350 watt geared motor

Charging Time: 4-6 hours for pennies

Battery: 2 Batteries: 36V 10.5 Ah

Battery Type: Sealed lead acid (IATA Certified A67)

Tires: Pneumatic

Color: White, Blue

Size: 40 x 26.8 x 38.6 in. (101.6 x 68 x 98 cm)

Weight: 85 lbs. (38.5 Kg)

Comes with: Tear Away Key, Headlight & Horn
